# Kateryna Medushyvska
Software Developer

Summary

Creative, innovative, and passionate web developer with excellent problem-solving skills, boasting 2 years of experience in a software development agency and 3 years of freelance design and web development, where I've completed over 30 projects.

Background in product marketing, product management, and web design and analytics makes a perfect fit for many projects. Been working remotely for 5 years, so know how to organize and streamline processes effectively.

Work with JavaScript, React, HTML, CSS, Tailwind, SCSS, Node.js, Vue.js, Next.js, MongoDB, and the MERN Stack in general. Always eager to learn new technologies, and currently excited to gain experience in TypeScript and Flutter.

Eligible to work in the EU and Canada. For the rest - can be hired as an independent contractor.

Work Experience

Software Engineer
Singsys Apps & web development agency, Singapore
www.singsys.com
March 2022 to May 2023 (1 year, 2 months)

- Developed high-quality applications using JavaScript, React, Redux, Vue.js, Node.js, Express, and MongoDB.
- Designed user interfaces using Figma, CSS, SCSS, Material UI, Bootstrap, and Tailwind.
- Wrote clean, efficient, and well-documented code that adhered to coding standards.
- Participated in code reviews and established best practices to ensure code quality.
- Worked with API's, including RESTful APIs, to integrate backend functionality into applications.
- Utilized GitHub and GitLab for version control and collaborative development.

Software Engineer trainee
